

## Fishing - The Ausseerland

The Ausseerland (that's the area surrounding Bad Mitterndorf) is a fisherman's paradise, without a doubt! There are numerous beautiful, unspoilt lakes, rivers, and streams where you can try your hand at fishing with a fly or spinner. All are well-stocked and in each and every one of them the water is crystal clear and generally of drinking-water-quality. In fact, one of our local rivers - the Koppentraun - has been rated one of the best stretches of water in the world for fly-fishing! The season runs from mid-March to the end of October and the main "catches of the day" are the following types of fish : brown trout, arctic char, rainbow trout and pike. If you haven't already tried fishing as a pastime and are interested in learning, tuition is available with all equipment supplied. Ghillies are also available as well as boats for lake fishing. Please contact us for details of fishing packages.
